Subject index*

A

Abstracts
Abstracts. 1987;15:81-93

Accidental needlestick
Recapping the accidental needlestick problem (Huber and Sumner). 1987;15:127-30 (Brief report)

Acquired immunodeficiency syndrome
Infection control and the autopsy of persons with human immunodeficiency virus (MacArthur and Schneiderman). 1987;15:172-7 (Brief report)

Airborne contamination
Airborne contamination associated with in-use air-fluidized beds: a descriptive study (Bolyard et al). 1987;15:75-8 (Brief report)

Air-fluidized beds
Airborne contamination associated with in-use air-fluidized beds: a descriptive study (Bolyard et al). 1987;15:75-8 (Brief report)

Angioplasty
Increased risk of infection after repeat percutaneous transluminal coronary angioplasty (Evans and Goldstein). 1987;15:125-6 (Brief report)

Antibiotics
Trends in infections and antibiotic usage in a community hospital (Larson et al). 1987;15:7-15

Arthroscopic knee surgery
Hospital-acquired infections after arthroscopic knee surgery: a probable environmental source (Ajemian et al). 1987;15:159-62 (Brief report)

Assessment
Nursing assessment program in infection control procedures (Weinstein et al). 1987;15:238-44

Autopsy
Infection control and the autopsy of persons with human immunodeficiency virus (MacArthur and Schneiderman). 1987;15:172-7 (Brief report)

B

Bacteremia
Neonatal intensive care unit bacteremia: emergence of gram-positive bacteria as major pathogens (Donowitz et al). 1987;15:141-7
Staphylococcus aureus bacteremia caused by infected intravenous catheters (Mylotte and McDermott). 1987;15:1-6

Bacterial growth
Bacterial growth under a transparent dressing (Callahan and Wesorick). 1987;15:231-7

Bacterial pneumonia
Nosocomial bacterial pneumonia: an overview (Pugliese and Lichtenberg). 1987;15:249-65 (CEU article)

Bacterial yield
Effect of sampling time on bacterial yield from the hands (Larson et al). 1987;15:272-3 (Brief report)

Beds
Airborne contamination associated with in-use air-fluidized beds: a descriptive study (Bolyard et al). 1987;15:75-8 (Brief report)

Blood processing
Method of blood processing affects the prevalence of cytomegalovirus excretion in newborn nurseries (Brady et al). 1987;15:245-8

Bone marrow cultures
Pseudoepidemic of *Mycobacterium fortuitum* in bone marrow cultures (Hoy et al). 1987;15:268-71 (Brief report)

Books
Book reviews. 1987;15:46; 95; 140; 183-5; 228-9; 274-5

Brief reports
Brief reports. 1987;15:26-41; 75-80; 120-30; 159-62; 212-20; 266-73

C

Canadian hospitals
Reuse of disposable medical devices in Canadian hospitals (Campbell et al). 1987;15:196-200

Catheters
Staphylococcus aureus bacteremia caused by infected intravenous catheters (Mylotte and McDermott). 1987;15:1-6

Change
Decade of progress: decade of change. The future is now! (Harkavy) 1987;15:221-5 (Special article)

Clinical phenomena
The infection control practitioner as investigator of clinical phenomena (Larson et al). 1987;15:215-20 (Brief report)

Commentaries
Commentary. 1987;15:131-4; 178-81

Community hospital
Trends in infections and antibiotic usage in a community hospital (Larson et al). 1987;15:7-15

*February, pp. 1-46; April, pp. 47-96; June, pp. 97-140; August, pp. 141-186; October, pp. 187-230; December, pp. 231-286.

Contamination
Airborne contamination associated with in-use air-fluidized beds: a descriptive study (Bolyard et al). 1987;15:75-8 (Brief report)
Coronary angioplasty
Increased risk of infection after repeat percutaneous transluminal coronary angioplasty (Evans and Goldstein). 1987;15:125-6 (Brief report)
Correction
Staphylococcus epidermidis: a significant nosocomial pathogen (Hamory et al). (1987;15:59-74). 1987; 15:158
Cytomegalovirus
Cytomegalovirus: epidemiology and infection control (Pomeroy and Englund). 1987;15:107-19 (CEU article)
Method of blood processing affects the prevalence of cytomegalovirus excretion in newborn nurseries (Brady et al). 1987;15:245-8

D

Disposable devices
Reuse of disposable medical devices in Canadian hospitals (Campbell et al). 1987;15:196-200
Dressing
Bacterial growth under a transparent dressing (Callahan and Wesorick). 1987;15:231-7

E

Education
Effectiveness of an infection control programmed unit of instruction in nursing education (Goldrick). 1987;15:16-9
Emollient
Microbiologic effects of emollient on gloved hands (Larson et al). 1987;15:168-71 (Brief report)
Epidemiology
Epidemiologic methods for selective surveillance (Tousey). 1987;15:148-58
Erratum
Staphylococcus epidermidis: a significant nosocomial pathogen (Hamory et al). (1987;15:59-74). 1987;15: 158
Expert witness
The infection control practitioner as expert witness (Dash). 1987;15:178-81 (Commentary)

F

Future
Decade of progress: decade of change. The future is now! (Harkavy) 1987;15:221-5 (Special article)

G

Gloved hands
Microbiologic effects of emollient on gloved hands (Larson et al). 1987;15:168-71 (Brief report)
Gram-positive bacteria
Neonatal intensive care unit bacteremia: emergence of gram-positive bacteria as major pathogens (Donowitz et al). 1987;15:141-7
Growth
Bacterial growth under a transparent dressing (Callahan and Wesorick). 1987;15:231-7

H

Haemophilus influenzae
Recovery of *Haemophilus influenzae* type b from hospital environmental surfaces (Gilsdorf and Herring). 1987;15:33-5 (Brief report)
Hands
Effect of sampling time on bacterial yield from the hands (Larson et al). 1987;15:272-3 (Brief report)
Microbiologic effects of emollient on gloved hands (Larson et al). 1987;15:168-71 (Brief report)
Hepatitis
Type non-A, non-B and type B hepatitis transmitted by a single needlestick (Mayo-Smith). 1987;15:266-7 (Brief report)
Hospital-acquired infection; *see* **Nosocomial infections**

I

Immunodeficiency virus
Infection control and the autopsy of persons with human immunodeficiency virus (MacArthur and Schneiderman). 1987;15:172-7 (Brief report)
Infant
Method of blood processing affects the prevalence of cytomegalovirus excretion in newborn nurseries (Brady et al). 1987;15:245-8
Neonatal intensive care unit bacteremia: emergence of gram-positive bacteria as major pathogens (Donowitz et al). 1987;15:141-7
Oxacillin-resistant coagulase-negative staphylococcal carriage rates in neonatal intensive care nurses and non-patient care hospital personnel (Slight et al). 1987;15:29-32 (Brief report)
Pseudoepidemic of salmonellosis in a nursery: importance of isolate serotyping (Baddour et al). 1987;15:79-80 (Brief report)
Infection control practitioner
The infection control practitioner as investigator of clinical phenomena (Larson et al). 1987;15:215-20 (Brief report)
Instruction
Effectiveness of an infection control programmed unit of instruction in nursing education (Goldrick). 1987;15:16-9
Instruments
Radiation sterilization of surgical instruments with a consideration of metal shielding on sterilization efficiency (Grecz et al). 1987;15:101-6
Intensive care unit
Neonatal intensive care unit bacteremia: emergence of gram-positive bacteria as major pathogens (Donowitz et al). 1987;15:141-7
Oxacillin-resistant coagulase-negative staphylococcal carriage rates in neonatal intensive care nurses and non-patient care hospital personnel (Slight et al). 1987;15:29-32 (Brief report)
Intravenous catheters
Staphylococcus aureus bacteremia caused by infected

intravenous catheters (Mylotte and McDermott). 1987;15:1-6

Isolation

Mobile high-containment isolation: a unique patient care modality (Wilson and Driscoll). 1987;15:120-4 (Brief report)

K

Knee surgery

Hospital-acquired infections after arthroscopic knee surgery: a probable environmental source (Ajemian et al). 1987;15:159-62 (Brief report)

Kuwait

Development of an infection control program in Kuwait (Larson). 1987;15:163-7 (Brief report)

L

Laboratory

Appropriate use of the microbiology laboratory in the diagnosis of infectious diseases (Bartels and Weinstein). 1987;15:187-95 (CEU article)

Letters

Handwashing studies sought (Larson). 1987;15:137

Infections and electronic pain control (Squires). 1987;15:42

Patient with AIDS in nursing home (Prather et al). 1987;15:182

Postdischarge surveillance (Jensen) (Letter); (Swift) (Letter reply). 1987;15:42

Rubella: one hospital's experience (Jacobson). 1987;15:136-7

Scabies (Meester et al) (Letter); (Cooper) (Letter reply). 1987;15:135

Staphylococcus aureus bacteremia (Gurevich) (Letter); (Mylotte and McDermott) (Letter reply). 1987;15:226-7

Literature

Literature reviews. 1987;15:43-5; 94; 138-9; 183-5; 228-9; 274-5

Long-term care facilities

Consensus conference on nosocomial infections in long-term care facilities (Smith). 1987;15:97-100

Routine surveillance for infections in nursing homes: experience at two facilities (Vlahov et al). 1987;15:47-53

M

Measles

Measles (rubeola) infection in a hospital setting (Watkins et al). 1987;15:201-6

Metal shielding

Radiation sterilization of surgical instruments with a consideration of metal shielding on sterilization efficiency (Grecz et al). 1987;15:101-6

Microbiology

Appropriate use of the microbiology laboratory in the diagnosis of infectious diseases (Bartels and Weinstein). 1987;15:187-95 (CEU article)

Microbiologic effects of emollient on gloved hands (Larson et al). 1987;15:168-71 (Brief report)

Mobile high-containment isolation

Mobile high-containment isolation: a unique patient care modality (Wilson and Driscoll). 1987;15:120-4 (Brief report)

Mycobacterium fortuitum

Pseudoepidemic of *Mycobacterium fortuitum* in bone marrow cultures (Hoy et al). 1987;15:268-71 (Brief report)

N

Needlestick

Recapping the accidental needlestick problem (Huber and Sumner). 1987;15:127-30 (Brief report)

Type non-A, non-B and type B hepatitis transmitted by a single needlestick (Mayo-Smith). 1987;15:266-7 (Brief report)

Neonatal intensive care

Neonatal intensive care unit bacteremia: emergence of gram-positive bacteria as major pathogens (Donowitz et al). 1987;15:141-7

Oxacillin-resistant coagulase-negative staphylococcal carriage rates in neonatal intensive care nurses and non-patient care hospital personnel (Slight et al). 1987;15:29-32 (Brief report)

Non-A, non-B hepatitis

Type non-A, non-B and type B hepatitis transmitted by a single needlestick (Mayo-Smith). 1987;15:266-7 (Brief report)

Nosocomial infections

Consensus conference on nosocomial infections in long-term care facilities (Smith). 1987;15:97-100

Nosocomial bacterial pneumonia: an overview (Pugliese and Lichtenberg). 1987;15:249-65 (CEU article)

Staphylococcus epidermidis: a significant nosocomial pathogen (Hamory et al). 1987;15:59-74 (CEU article)

Nursery

Method of blood processing affects the prevalence of cytomegalovirus excretion in newborn nurseries (Brady et al). 1987;15:245-8

Pseudoepidemic of salmonellosis in a nursery: importance of isolate serotyping (Baddour et al). 1987;15:79-80 (Brief report)

Nursing assessment

Nursing assessment program in infection control procedures (Weinstein et al). 1987;15:238-44

Nursing home

Routine surveillance for infections in nursing homes: experience at two facilities (Vlahov et al). 1987;15:47-53

O

Oxacillin

Oxacillin-resistant coagulase-negative staphylococcal carriage rates in neonatal intensive care nurses and non-patient care hospital personnel (Slight et al). 1987;15:29-32 (Brief report)

P

Percutaneous transluminal coronary angioplasty

Increased risk of infection after repeat percutaneous

transluminal coronary angioplasty (Evans and Goldstein). 1987;15:125-6 (Brief report)

Pharyngitis
Role of rapid tests for streptococcal pharyngitis in hospital infection control (DeNeef). 1987;15:20-5

Pneumonia
Nosocomial bacterial pneumonia: an overview (Pugliese and Lichtenberg). 1987;15:249-65 (CEU article)

Program development
Development of an infection control program in Kuwait (Larson). 1987;15:163-7 (Brief report)

Programmed instruction
Effectiveness of an infection control programmed unit of instruction in nursing education (Goldrick). 1987;15:16-9

Progress
Decade of progress: decade of change. The future is now! (Harkavy) 1987;15:221-5 (Special article)

Pseudoepidemic
Pseudoepidemic of *Mycobacterium fortuitum* in bone marrow cultures (Hoy et al). 1987;15:268-71 (Brief report)
Pseudoepidemic of salmonellosis in a nursery: importance of isolate serotyping (Baddour et al). 1987;15:79-80 (Brief report)

R

Radiation sterilization
Radiation sterilization of surgical instruments with a consideration of metal shielding on sterilization efficiency (Grecz et al). 1987;15:101-6

Reviews
Book and literature reviews. 1987;15:43-6; 94-5; 138-40; 183-5; 228-9; 274-5

Rubeola
Measles (rubeola) infection in a hospital setting (Watkins et al). 1987;15:201-6

S

Salmonellosis
Pseudoepidemic of salmonellosis in a nursery: importance of isolate serotyping (Baddour et al). 1987;15:79-80 (Brief report)

Sampling time
Effect of sampling time on bacterial yield from the hands (Larson et al). 1987;15:272-3 (Brief report)

Serotyping
Pseudoepidemic of salmonellosis in a nursery: importance of isolate serotyping (Baddour et al). 1987;15:79-80 (Brief report)

Shielding
Radiation sterilization of surgical instruments with a consideration of metal shielding on sterilization efficiency (Grecz et al). 1987;15:101-6

South Florida Hospital Consortium for Infection Control
South Florida Hospital Consortium for Infection Control: structure and function (Ehrenkranz). 1987;15:36-41 (Brief report)

Special article
Decade of progress: decade of change. The future is now! (Harkavy). 1987;15:221-5

Staphylococcal infection
Oxacillin-resistant coagulase-negative staphylococcal carriage rates in neonatal intensive care nurses and non-patient care hospital personnel (Slight et al). 1987;15:29-32 (Brief report)
Staphylococcus aureus bacteremia caused by infected intravenous catheters (Mylotte and McDermott). 1987;15:1-6
Staphylococcus epidermidis: a significant nosocomial pathogen (Hamory et al). 1987;15:59-74 (CEU article)

Sterilization
Radiation sterilization of surgical instruments with a consideration of metal shielding on sterilization efficiency (Grecz et al). 1987;15:101-6

Streptococcal pharyngitis
Role of rapid tests for streptococcal pharyngitis in hospital infection control (DeNeef). 1987;15:20-5

Surgical instruments
Radiation sterilization of surgical instruments with a consideration of metal shielding on sterilization efficiency (Grecz et al). 1987;15:101-6

Surgical wound
Surgical wound infections documented after hospital discharge (Brown et al). 1987;15:54-8

Surveillance
Epidemiologic methods for selective surveillance (Tousey). 1987;15:148-58
Routine surveillance for infections in nursing homes: experience at two facilities (Vlahov et al). 1987;15:47-53

T

Transluminal coronary angioplasty
Increased risk of infection after repeat percutaneous transluminal coronary angioplasty (Evans and Goldstein). 1987;15:125-6 (Brief report)

Transparent dressing
Bacterial growth under a transparent dressing (Callahan and Wesorick). 1987;15:231-7

V

Varicella
Comparison of historical and serologic immunity to varicella-zoster virus in 373 employees (Donowitz et al). 1987;15:212-4 (Brief report)
Varicella in hospital personnel: a challenge for the infection control practitioner (Haiduven-Griffiths and Fecko). 1987;15:207-11

Virus
Comparison of historical and serologic immunity to varicella-zoster virus in 373 employees (Donowitz et al). 1987;15:212-4 (Brief report)

Cytomegalovirus: epidemiology and infection control (Pomeroy and Englund). 1987;15:107-19 (CEU article)

Infection control and the autopsy of persons with human immunodeficiency virus (MacArthur and Schneiderman). 1987;15:172-7 (Brief report)

Method of blood processing affects the prevalence of cytomegalovirus excretion in newborn nurseries (Brady et al). 1987;15:245-8

Type non-A, non-B and type B hepatitis transmitted by a single needlestick (Mayo-Smith). 1987;15:266-7 (Brief report)

Varicella in hospital personnel: a challenge for the infection control practitioner (Haiduven-Griffiths and Fecko). 1987;15:207-11

W

Witness

The infection control practitioner as expert witness (Dash). 1987;15:178-81 (Commentary)

Wound

Surgical wound infections documented after hospital discharge (Brown et al). 1987;15:54-8
